PROFILE:

As a junior front-end software developer with a background in music production, I bring a unique blend of technical expertise and creativity to software development. With a solid foundation in JavaScript, React, HTML, CSS and Git, I am passionate about using my skills to build innovative solutions that solve complex problems. My background in music production and sound engineering has given me a deep understanding of creating immersive experiences that engage and delight users. I thrive in collaborative environments and am committed to delivering software that not only meets functional requirements but also delivers an enjoyable user experience.
